

The Vibe Coder – Business Introduction & Service Quotation

Smart CRM Automation for Instagram & WhatsApp

 [Website](#)

About Us

The Vibe Coder is a lightweight, automation-first CRM suite purpose-built for modern creators, D2C brands, and small businesses operating on **Instagram** and **WhatsApp**. Our goal is simple — turn your followers into paying customers through automated, real-time interactions.

We eliminate manual follow-ups, streamline sales via direct engagement tools, and bring CRM capabilities to platforms where your audience already lives. With a plug-and-play model designed for **speed**, **simplicity**, and **scalability**, we empower you to close orders 24/7 — with zero manual effort.

Our Solutions

1. Instagram Automation (Comment + Keyword Driven)

-  Users comment on your post using trigger words like “Price”, “PP”, or “Kimat”
-  Our automation engine instantly responds via Direct Message (DM)
-  Engaged users are guided through a structured order placement flow
-  All activity is tracked and logged via integrated **Google Sheets**

2. Instagram Story Automation (DM-Based Triggers)

-  Viewers respond to your story with a preset keyword (e.g., “Price”)
-  This automatically initiates an order confirmation conversation
-  Seamless integration with your backend or Google Sheets for tracking

3. WhatsApp CRM Automation

-  Intelligent AI-powered threads for DM-based customer engagement
-  Features include customer tagging, reply tracking, and smart auto-responses

-  Best suited for handling repeat queries and nurturing inbound leads

Pricing

| Package | Inclusions | Price |
|------------------------------|---|-------------------|
| Full Setup (AI-Enabled) | Upto 100 automations across posts, reels, and stories | ₹50,000 |
| Instagram Keyword Automation | Account-based comment and story automation | ₹25,000 / account |

✓ All packages include Google Sheet integration, onboarding support, and deployment assistance.

Tech Stack & Infrastructure

- **No-Code Backend:** Built for rapid configuration and zero-lag execution
- **Live Hosting:** Static frontend with markdown-based updates via GitHub Pages
- **Reference Systems:** Inspired by kommo.com/instagram & crm-messaging.cloud

Delivery Timelines

-  Portfolio Website + Onboarding Docs: **By April 19 (Evening)**
-  Client-Ready Demo + Pitch Deck: **By April 19 (Night)**
